

TwoNav Sportiva2: *With TwoNav Sportiva2 you will get very far!*

Following the success reaped by the innovative TwoNav Sportiva, CompeGPS announces the launch of an improved second edition. The current version includes important improvements which confirm it as one of the most intuitive, light and powerful GPS devices on the market. TwoNav Sportiva2 allows you to manage your activities as you have always dreamed for:

- Quick and precise GPS positioning
- Up to 3 hours more of autonomy
- An interface with much more agile and fluid map movements

Great news for a new generation

After the excellent response to the TwoNav Sportiva the team of CompeGPS worked intensely on an improved second version.

- ↑ The current TwoNav Sportiva2 has an improved GPS chip which provides a much faster and much more precise positioning.
- ↑ Its new replaceable battery has been designed to obtain 3 additional hours of autonomy, so that the new Sportiva2 can last up to 15 hours.
- ↑ Its internal memory also has improved in capacity -doubling from 2GB to 4GB-, allowing you to notably increase the content saved on the new TwoNav Sportiva2.
- ↑ Finally, and in order to provide improved fluidity to its interface, CompeGPS has increased the RAM of the Sportiva2, from the previous 64MB to the current 128MB of RAM.

CompeGPS has also not forgotten about the importance of aesthetics. The TwoNav Sportiva2 will be recognized due to its elegant design in grey on black.

Main Features

Light, robust and multifunctional, the new TwoNav Sportiva2 is designed to guide you through any activity and through any terrain, be it for walking, biking, geocaching or even if you are paragliding - because this small and ultra light GPS weighs only... 124 grams!

The new TwoNav Sportiva2 offers a broad range of integrated tools, such as an electronic 3D compass or a barometer, so that you can enjoy your activities to the max, without worrying about the dirt on the terrain or even water - it is certified for resistance.

Its transfective 3-inch touch screen provides an excellent resolution of 240 x 400 pixels for you to view your maps in high definition even under sunlight, while the touch screen technology enables easy interaction with the new GPS.

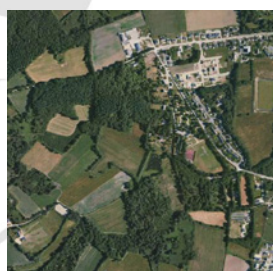

Easy navigation

The intuitive software CompeGPS integrated into the new TwoNav Sportiva2 has been designed to satisfy the needs of any type of user, from beginners to experienced professionals. The new Sportiva2 offers a large quantity of tools, like the possibility to prepare your track directly over the screen of the device, to personalize the menus or to choose among the over 80 available data fields to fit your needs, including accumulated elevation, speed, height, distance....

Broad cartography

Thanks to our Land software and the notable increase in memory, with the new Sportiva2 you can use and transfer a broad range of formats and use topographic maps, satellite images, street maps or even old paper maps, previously scanned, which are not available in digital format. CompeGPS also offers the possibility to include high quality maps of all over the world. Additionally, the new Sportiva2 offers you free street maps -Open Street Maps- of the most important cities from all over the world.

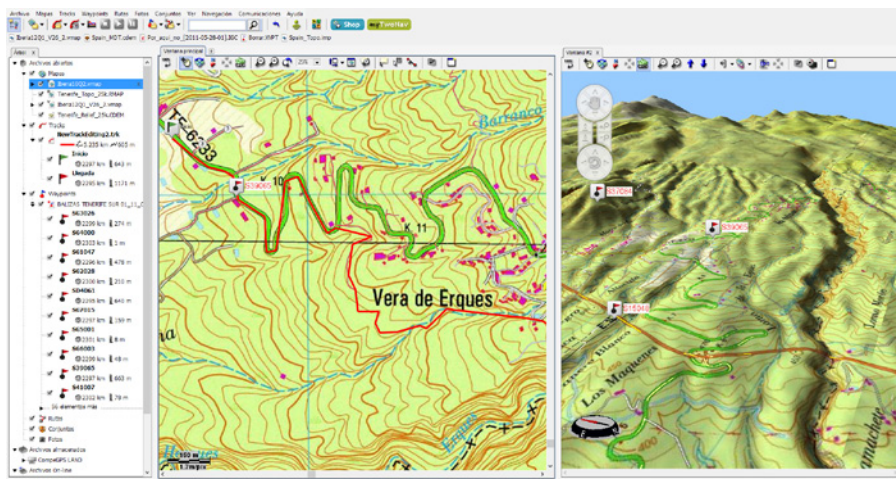

A 3D experience

With the new Sportiva2 you will be able to live a 3D experience with a cartographic realism which will surprise you, as it includes the map of your country and provides the possibility to extend your map archive through our web www.compegps.com.

PC connection

At CompeGPS we have thought of your need to combine the features of the new Sportiva2 with a PC software -CompeGPS Land- which attends to all your needs, whether you are a PC or Mac user.

In this respect, our Land software allows you to prepare and analyse your excursions comfortably from home, creating your own calendar, excellent graphics and managing all the content on your new GPS. You can also convert all your data into the format you wish to share it or publish it on your blog and to create unlimited tracks, routes and waypoints, as the new Sportiva2 is compatible with the most common format and is able to download tracks from the most important websites of the world, such as Everytrail.com, GPSies.com or Tracegps.com, among others.

TwoNav Sportiva2 will take you anywhere you want to go!
