

TwoNav Ultra: *Design and functionality to provide a powerful performance*

A GPS which is robust, light and small, giving just as much importance to the aesthetics as to improving your workout efficiency.

TwoNav Ultra is the first wrist-worn GPS with integrated compass and barometer, providing a smooth orientation with color and high resolution maps.

Barcelona, October 9th, 2012. With the launch planned for November 2012, TwoNav Ultra will revolutionize the sports industry. Its reduced format, coupled with the most advanced technology, will answer the needs of a vast number of outdoor enthusiasts: bikers, trail runners, walkers...

More competitive than ever

A large number of features have been designed in co-operation with leading athletes in order to introduce the brand TwoNav to the **training industry**. Get the chance to program the timing or the distances of your next workout, activate 'Virtual Coach' function or define cardiac output to improve your results. Discover 'TrackAttack™', a feature which will enable you to **challenge your friends** on the same track, **overcome your own limits** and break your own records.

The **dynamic alerts** are programmed individually and will guide you through your activities to inform you with respect to your previously set targets. Observe any of the over **80 types of data** at any time. You can organize the data fields that you choose on data pages according to your preferences, feel free to customize your application!

As its predecessor, TwoNav Sportiva+, the TwoNav Ultra is equipped with ANT+™ technology in order to receive better precision while controlling your heart rate, cadence or speed, hence offering an **improved control** of your effort.

The best maps worn on your wrist

"Our main challenge was to find the ideal combination between the weight and size of the device, while at the same time, a screen which will guarantee **perfect visibility of the maps**"

"The digital maps have always been a priority to us. CompeGPS is proud to be able to offer the possibility to carry them along with you, wherever you go. The device fits into any pocket", comments Florian Gratién, Marketing Director at CompeGPS.

The TwoNav software, installed by default on all TwoNav Ultra devices, offers the possibility to work with multiple formats of maps. This includes topographic maps of the most prestigious cartographic

institutes of Europe: IGN Spain, IGN France... Not only this, but also navigable road maps, to avoid getting lost in any city, with satellite images in high resolution and scanned paper maps for the practice of orienteering sports.

The new device of the TwoNav brand, adjusts to your wrist at the blink of an eye thanks to its flexible silicone strap with low perspiration areas. Its 3D compass and barometric altimeter turn it into the ideal tool for outdoor activities.

Technology for everybody

The touch screen is perfectly visible under sunlight and, together with the four lateral buttons for direct access -ideal for use even wearing gloves- ensuring simple navigation. The TwoNav interface has been completely revamped in order to be even **more intuitive and accessible** for any type of user.

Mounted on your bike, worn on your wrist or even stowed in your pockets, TwoNav Ultra will guide you during all your activities. Let your curiosity fly and explore nature around you, without fear; the 'TrackBack' function will always guide you safely back to your starting point.

Prepare, analyze and share

As with the entire TwoNav range, Ultra is compatible with the **powerful PC software for preparation and analysis** (Windows/Mac): Land

Get the chance to manually define your itineraries on three dimensional maps or download the best tracks created by other users - thanks to direct access links, to free track servers (EveryTrail, GPSies...). Once you have completed your activity, manage your routes, visualize elevation graphics, analyze or compare portions of the track comfortably from home.

Share your adventures and training sessions easily with your friends and acquaintances through social networks from your personal space 'myTwoNav'.
