Sportiva2+

Sportiva2+ is the perfect device for **cycling** and **mountain** biking. This product combines all the attractive features of Sportiva as well as **ANT+™ technology** to transmit data wirelessly.

CompeGPS brings you one of the most complete collections of maps: TomTom® vectorial maps, topographic and satellite map pictures (ICC, IGN, CNIG...). You only have to pick the map that you want and start the trip, do not forget that you can **record your own track!**

By working with **e-Roadbooks**, you will be able to draw your own tracks, add comments and pictures of tricky crossroads. Once you have finished your work on PC, you will be able to send it to the **GPS device**.

Take the chance to use functions such as **Virtual Coach** and data field alarms!

GPS Design

- Dimension: 58 x 105 x 23 mm
- Weight: 124 g (battery included)
- Screen: Transflective touchscreen (3")
- Resolution: 240 x 400 pixels
- Certification: IPX6
