

# Tutorial configuración GPRS con móviles Nokia Versión 1.0

**COMIPE GPS**

## Índice

<b>1</b>	<b>TUTORIAL DE CONFIGURACIÓN BÁSICO DE GPRS PARA MÓVILES NOKIA 6600 (VÁLIDO PARA OTROS MODELOS NOKIA) .....</b>	<b>3</b>
<b>2</b>	<b>ANEXO CONFIGURACIÓN GPRS DE DIFERENTES OPERADORAS DE TELEFONÍA MÓVIL EN EL MUNDO.....</b>	<b>5</b>

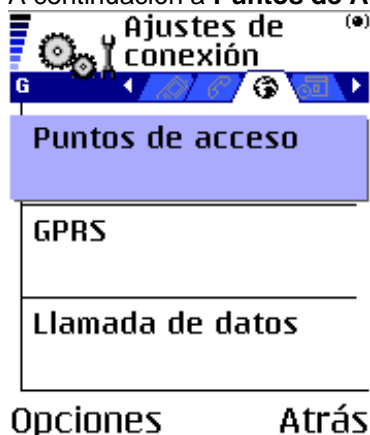

## 1 Tutorial de configuración básico de GPRS para Móviles Nokia 6600 (válido para otros modelos Nokia)

Para conectar su teléfono móvil Nokia a Internet mediante GPRS debe seguir los siguientes pasos. Normalmente si el teléfono móvil es de una operadora de telefonía móvil ya viene con una configuración por defecto pero debe repararla para comprobar si funciona con Internet.

1. Vaya al **menú > Herramientas > ajustes > Conexión**

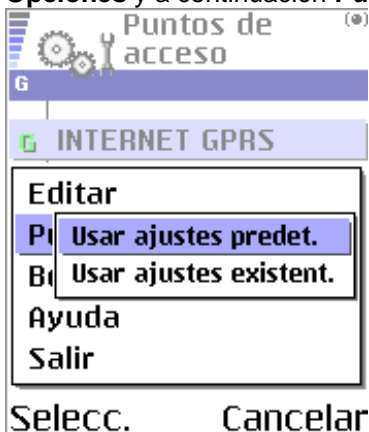

2. A continuación a **Puntos de Acceso**

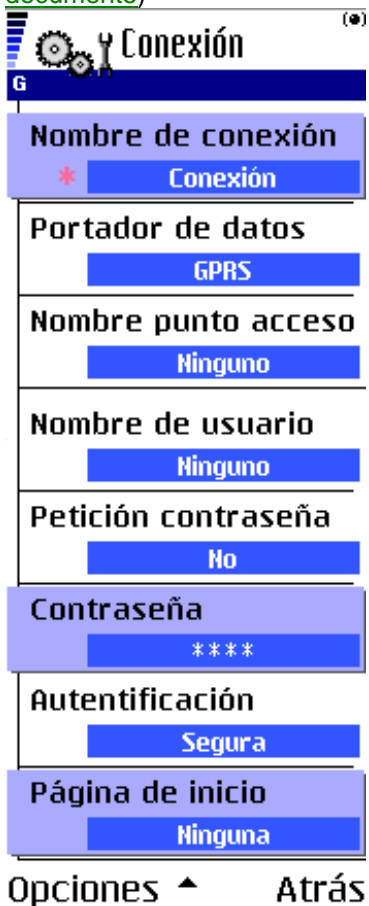

3. En este punto a lo mejor ya tiene alguna configuración hecha, la que debería usar es la que dice **Internet GPRS** pero dependiendo de la preconfiguración que disponga pondrá alguna cosa parecida. En cualquier caso deberíamos configurar un punto de acceso nuevo.

4. Para configurar un punto de acceso nuevo debe pulsar el botón izquierdo (de su Nokia 6600) **Opciones** y a continuación **Punto acceso nuevo > Usar ajustes predet.**

5. A continuación debe rellenar los campos según la configuración que le debe proporcionar su operadora de telefonía móvil ([ver anexo de resumen conexiones de su compañía al final de este documento](#))

## 2 Anexo Configuración GPRS de diferentes operadoras de telefonía móvil en el mundo
