TwoNav Delta offers you a huge variety of tools to make each of your outdoor activities unique.

- **4,3" sunlight viewable screen** with an impressive resolution of **240x400**
- Robust and extremely resistant product which includes the **IP57 certification**
- Topographic, satellite pictures, scanned maps, TomTom ® Urban maps, Navionics Gold ® maps...

TwoNav Delta brings you an infinite variety of features, suitable for **mountains, roads, and even for the sea!** With its **big touchscreen**, and the possibility to use both urban and topographic maps, this robust GPS is clearly designed for **Moto, Quad and 4x4 fans.**

TwoNav Delta is a **robust and extremely resistant** product which includes the **IP57 certification** (water-proof and dust certification). The **touch screen** combined with an intuitive software will ensure a **highly reliable and secure guidance.**

"This is not a simple positioning GPS device, it is a great tool which can work with maps and files of **all kinds of formats.** This is something very important and quite difficult to find nowadays. In addition, you can work with data from **Land (PC software)**, once you have finished to create or edit your track, you only need to transfer the information to TwoNav GPS. This device has been designed for outdoor use, so it can resist **all kind of elements** as well as bad weather. TwoNav Delta is being presented with a solid anchor bracket for your bike. You will have no problems to install it" says Jordi Arcarons, 16-time Rally Dakar participant.

Designed for rugged outdoor use, made of **marine aluminium and stainless steel**, RAM ® is the ideal accessory for your Delta. Included in the box, you will find a base for **handlebars** as well as Delta's arm, the perfect combination for your Moto, Quad or Boat.

Even Delta's speakers are very powerful, you would get the possibility to connect **Bluetooth** headphones in order to get all the navigation indications more clearly.
