TwoNav
by CompeGPS

TwoNav is the easiest, yet most powerful soft-
ware for the outdoor enthusiast. A dual navi-
gation system (on-road/off-road) to make the
most of your outdoor activities, whatever they
are: Hiking, biking, geocaching, 4x4...

Let us provide you with a single navigation solu-
tion for all your orientation needs. Just one tool
to find your way in any kind of environment.

MAPS: online, offline, no limit

A large portfolio of topographic maps for OFFLINE access:

- CompeGPS has the biggest topographic map portfolio from official mapping agencies: Spain (IGN), France (IGN), Germany (BKG), Finland, Switzerland, Netherlands, Belgium, Chile... all in the best scale available. The widest topographic map portfolio in the market!
- Download by tiles or zones (depending on the country) in www.compegps.com and use it in your mobile/laptop offline.

Load your OWN MAPS:

- Convert many map types and formats (.map,.jpg,.gif, .tif, etc) with our free CompeGPS Land PC version available at www.compegps.com.

Unlimited and FREE Online MAPS included:

- Full coverage of Spain and Italy with topographic (1:25 000) and orthophotos (50cm/pixel).
- Full coverage of USA and Canada with topographic maps from MyTopo (enhanced and seamless version of USGS dataset, with US Forest Service updates, and the official DRCan maps).
- OpenStreetMap and OpenStreetMap Cycle Map worldwide coverage.
(To receive all these maps, take the option to download default data at first launch).

MANAGE YOUR DATA: easy, powerful

- UNLIMITED tracks, routes and waypoints
- Create, edit and follow them directly on your laptop or mobile
- Navigate North up or Track up to better fit your needs
- Compatibility with GPX, PLT format but also CompeGPS own format (size-efficient and feature-rich)

TRACK YOUR PERFORMANCES

- Your altitude with the highest precision (sole application to apply geoid correction for better accuracy)
- Compass, altitude graph and data page
- More than 60 on-screen trip stats (speed, average speed, chronometer, estimated time and distance to destination, accumulated climb, maximum altitude, coordinates, sunset/sunrise time...)

IMPRESSIVE 3D VIEW

Download our free 3D maps from all around the World and work in the most realistic way.
You won't believe it! Zoom in and out, rotate in all the directions, it's time to give a new dimension to your maps.

You will be also able to replay your best performances in real time, quietly in front of your PC and in real 3D!
(Note: for 3D you need the 3D relief file freely downloadable from our Website)

ONROAD NAVIGATION: 2 GPS in 1 (need a specific street map to be unlocked)

Buying a Tele Atlas Vmap in www.compegps.com website (check the catalogue) will allow you to activate the Onroad mode of TwoNav without software change (just putting the maps in maps folder). With all the classical GPS car navigator features, you will discover all the power of TwoNav's dual navigation. Main features (if unlocked):
- Turn-by-turn voice guidance
- Speed limit/camera alerts
- Search by address, map, history...
- Favorites manager
- Itinerary management
- Smoother to better calculate distances and the exact moment in which to carry out a manoeuvre...

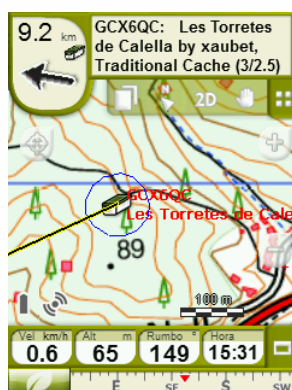

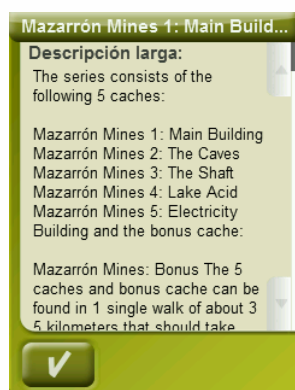

Take the most of you favorite activity

- Navigate on your own Roadbooks, created with Land software
- Virtual Coach: Challenge yourself by competing with your shadow
- Alarms (programm minimum and maximum value): Optimize your trainings and better adjust your efforts
- Man over board funcion
- Compatibility with Navionics maps
- Advanced transparency system to combine the information of several maps
- Access to free online maps (like OpenStreetMaps)
- And much more

www.twonav.com - www.compegps.com
