

1 BEFORE YOU START

Thank you for choosing **Horizon**. This guide will teach you how to get the maximum out of your device.

First of all, we strongly recommend you to register your device. Using your personal computer, access the following site and follow the instructions:

twonav.com/start

The registration process is very simple and will help you to keep your device updated and synchronized. Among several actions you will be able to:

- Activate **SeeMe** to share your current position
- Set up **emergency notifications (ICE)**
- Access **GO cloud**
- Install additional software for your **smartphone and computer**
- Install high quality **maps** of your country

2 INITIAL BOOT-UP

Charge the device by connecting it to the charger with the supplied USB cable.

When the unit is charged long press the 'Power' button to turn it on.

During boot up you will be able to set up the **Wi-Fi** connection.

Remember to connect the device to your Wi-Fi network so it can automatically carry out two important processes:

- **Update the TwoNav software of your GPS**
- **Synchronize all your data with GO cloud**

3 INTERFACE

BLOCK button:
• Shutdown screen and block buttons

Map:
Press on the map to activate the tools

Data bar:
Press to access the data pages

Main menu:
Manage files and settings on your device

START / PAUSE button:
• Short press: Start activity / Pause activity
• Long press: Mark lap

Activity control:
Start, pause and finish an activity

Status:
Press to check the status of the most frequently used features (sensors, GPS...)

POWER button:
• Long press: Turn GPS on / Turn GPS off

Contextual menu:
Press to access options available for the current page

PAGE button:
• Short press: Show next data page

4 ACTIVITY CONTROL

Horizon features several types of **activities** such as follow a route, go to a waypoint or even workout.

Press 'Start' button to select the type of activity you want to perform.

During the activity, 'Start' button will change its appearance. Press it again to pause or finish the activity.

5 SET-UP

BACK COVER

BIKE COVER

Important: To mount Horizon on a bike use the 'bike' battery cover model as the back cover. This cover and the bike support are included in Horizon Bike. They can also be purchased separately

STEM BIKE MOUNT

6 SENSORS

From 'Main menu > Settings > Sensors' you will be able to manage the connection to **BLE/ANT+™** sensors such as heart-rate monitors, cadence sensors and speed sensors.

EXTERNAL SENSORS

To activate external sensors you must complete the pairing process.

Important: Please, ensure the sensors are installed and activated before pairing. You may have to moisten the heart-rate monitor or turn the pedals to activate them

7 SeeMe

Your device features a wireless communications technology to share your position without having to rely on your smartphone.

Broadcast: If you activate this function in the status window, your contacts will be able to track your progress during your outings.

Emergency: Click the 'Emergency' button on the status window to send a help message to your emergency contact.

Important: In order to use SeeMe, you must activate the service at twonav.com/start

8 GO CLOUD

Just for being a TwoNav user, you have a personal storage area in **Go cloud** to save your data.

In order to sync your tracks with the cloud, activate the sync function from 'Main menu > Settings > GO cloud'

Syncing takes place when the device is connected via USB to a computer or wirelessly via Wi-Fi.

From go.twonav.com you will be able to manage your activities and share them on social media and Strava.

Remember that GO cloud is also synchronized with **Land**, the powerful software to plan and analyze your outdoor activities.

9 LAND

Land software (PC/Mac) is the perfect complement for Horizon.

Create and edit your own routes using maps from all over the world. Analyze every aspect of your activities and improve your performance.

With Land you will also be able to update and sync your device through USB connection as an alternative to wireless connection.

Download Land for free at land.twonav.com

10 WARRANTY

The warranty begins on the day of delivery of the product purchased from COMEGPS TEAM SL or any official distributor of COMEGPS TEAM SL and refers to all types of material damage or production defect that could arise under the normal use of the device. In the case of any claim it will be required to present the original proof of purchase provided together with the product. COMEGPS TEAM SL and their authorized distributors reserve the right to refuse a warranty repair if these documents are not presented.

In case of a defect of a product of COMEGPS TEAM SL which is covered by this warranty, COMEGPS TEAM SL assures the repair or replacement within the limits of proportionality.

This warranty does not cover cells, batteries and other consumables. COMEGPS TEAM SL does not warrant the precision of map material whose intellectual property belongs to third parties.

COMEGPS TEAM SL does not accept responsibility for the cost of software configuration, loss of income, loss of software files or any other collateral damages. When proceeding to repair the product, COMEGPS TEAM SL might be forced to delete the files stored on the device. Please ensure, before shipping the product, to have a backup of all the files of the device.

If during the repair it is discovered that the defect is not covered by the warranty, COMEGPS TEAM SL reserves the right to invoice the customer for the expenses incurred by the repair in terms of materials used, work and other costs, after presenting a budget.

COMEGPS TEAM SL does not warrant defects and damages caused by external factors or the user, such as accidental damages, inadequate use or modifications, refits, extensions, use of parts from other manufacturers, carelessness, viruses or software errors, inappropriate transport or packaging.

Warranty extinguishes in case that the defect of the products has been caused by maintenance or repair carried out by other parties than COMEGPS TEAM SL or any technical service authorized by COMEGPS TEAM SL for this product. The warranty also expires when the adhesive, safety seals or serial numbers of the product or an integral part of the same have been modified, manipulated or damaged in a way that makes them unreadable.
