

## GPS TRAIL 2 PLUS: ENJOY ALL TERRAINS WITH A SINGLE DEVICE

TwoNav is a Spanish company specialized in navigation and outdoor sports. Recently at **Eurobike**, the world's most important bicycle fair (July 13-17 in Frankfurt, Germany), we presented **Trail 2 Plus**, our new multisport GPS.

### Use one device for all your activities

Trail 2 Plus is the evolution of Trail 2, a versatile GPS designed for off-road users who want to explore the outdoors in many different ways: hiking, MTB, gravel, quad, motorcycle...

Trail 2 Plus features the following improvements:

- **Better electronics:** Optimized electronics for higher performance and reliability
- **GNSS chip:** New Beidou satellite network added to the GPS + Glonass and Galileo. SBAS / EGNOS availability to further improve your position accuracy
- **Dual Bluetooth:** Connect with several bluetooth devices at the same time (sensors, smartphone...)
- **5G Wi-Fi:** Faster file and data transfer
- **TomTom™ map:** In addition to a topographic map, Trail 2 Plus includes a TomTom road map of your country, free of charge
- **Compatibility with hiking and biking accessories:** The Trail 2 Plus quicklock is compatible with the whole range of accessories

### Prepared to resist everything

Trail 2 Plus is a medium-sized device (**80 x 131 x 20 mm** and 220 g) prepared to resist any situation, even the most adverse. It has the MIL-STD-810 military certification in resistance to shocks, vibrations and low/high temperatures (from -20°C to +50°C).

Trail 2 Plus features one of the largest capacitive touchscreens on the market (**3.7"** and 480 x 640 pix). It is made from **Gorilla Glass** so you will achieve impact and scratch-proof resistance and, at the same time, optimal visibility even in direct sunlight, thanks to optical bonding **Blanview technology**. Use the screen to explore new places near your position, find shortcuts and alternative paths, work with several maps at the same time. Trail 2 Plus has **32 GB of internal memory**, which can be used to load tracks and maps of places you would like to explore.

Nothing will stop your desire to discover the world, the **20 hours of autonomy** (4,000 mAh) make Trail 2 Plus one of the most durable GPS on the market, you use it for several days without needing to recharge it.

## A reliable GPS in any circumstance

Trail 2 Plus is compatible with our range of hiking and biking accessories. With the **quicklock fixing** you will be able to fix the GPS on the **handlebar** or on the **stem** of your bike to have quick and comfortable access to Trail 2 Plus at any time while riding. If you also hike, use the same quicklock system with our **backpack** and **belt** accessories and you will always have the GPS at hand in any situation.

In addition, the **6 physical buttons** of Trail 2 Plus (4 on the front and 2 on the sides) give you total control over the GPS, even when you wear **gloves** or when it rains or you get splattered with mud. Its battery is also protected from water: it is integrated into a hermetic and waterproof casing.

## Precise orientation and enhanced safety in the mountains

Trail 2 Plus comes equipped with a powerful GNSS chip with **4 positioning networks** (GPS, Galileo, Glonass and Beidou) and provides precise GPS positions anywhere in the world. In addition, thanks to a network of geostationary satellites **SBAS / EGNOS** it will further improve the accuracy of your positioning.

If at any time, you face an unforeseen situation or experience any danger, send an emergency notification with the exclusive SeeMe™ service of Trail 2 Plus. With **SeeMe™** you can also broadcast your position in real time to all your contacts.

## Always connected - wherever you go

If you don't have routes for the area you are going to visit, you can connect to online route providers (Komoot, Trace GPS, UtagawaVTT...) to find a selection of the best ones. With Trail 2 Plus's **5G Wi-Fi** you will be able to download the route that suits you best at high speed.

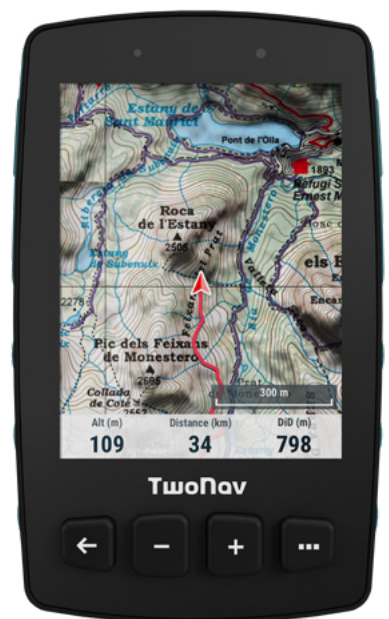

In addition to 5G Wi-Fi, Trail 2 Plus also has **Dual Bluetooth**, connect the device to a heart rate or cadence sensor to follow your progress in real time and, simultaneously, be able to visualize your **WhatsApp** notifications on the screen of Trail 2 Plus.

Once back home, Trail 2 Plus will automatically sync new activities and save them to the GO Cloud, a safe and reliable place to store your best outdoor experiences. From the **GO Cloud** you will be able to share your best outings with friends and other fans on social networks.
